Audio Power Pmplifier

Specs

- Class: AB
- Power: 100W rms
- 1 output channel (mono)
- 6 inputs

Construction

- Power stage:
    - The power amplifier as an IC – STK4050II, in AB class
    - Power source using toroidal transformer
- Preamplification stage:
    - TL074 OpAmps
    - Active filter for bass and trebble using OpAmps
    - Potentiometers for bass and trebble, gain and volume control
    - Step down transformer and voltage regulators for 12V
- Design
    - AutoCAD for enclosure and arrangement drawings
    - Proteus for circuit and PCB design
    - The circuits and components were enclosed and arranged into an adequate case
